**CLAUDIA  
MANPERL:  
A WOMAN'S  
JOURNEY**

Claudia Manperl is driven to breathe life into bronze. Her creative quest centers around the human form, playing with valleys and summits, curves and tensions, to discover the woman within.

Her work displays a playful, yet earnest philosophy: play with life, escape from the everyday, hold onto your insanity. This philosophy informs her work, which brings together whimsy and gravity in a refreshing way. Now that work is available in the US through Italice.

Italice specializes in the production and publishing of fine art in bronze. Today we are known internationally for providing the highest quality sculptures for galleries and private collectors with limited editions.
